

*Dracaena arborea*, *Eupatorium odoratum*, *Glossocalyx brevipes* and *Napoleonaea imperialis*, wherein said extract is extracted using an organic solvent.

(ii) Please add new claims 30-35:

30. (New) A biologically active extract as recited in claim 1 wherein said solvent is selected from a group consisting of hexane, chloroform, ethyl acetate and methanol.

31. (New) A biologically active extract as recited in claim 30, wherein said solvent is methanol.

32. (New) A biologically active extract as recited in claim 30, wherein said solvent is ethyl acetate.

33. (New) A method for forming a biological extract of *Napoleonaea imperialis* including the steps of:

- (a) mixing powdered seeds of *Napoleonaea imperialis* with a solvent;
- (b) extracting said extract from said seeds; and
- (c) concentrating said extract to dryness.

34. (New) A method for forming a biological extract as recited in claim 33 wherein said solvent of said mixing step (a) is methanol.
